

Dear colleagues,

We invite students and professionals of your university to attend the Prague Multimedia Summer School at Institute of Intermedia at Czech Technical University.

MAKE THE MOST OF YOUR SUMMER – PARTICIPATE IN THE PRAGUE MULTIMEDIA SUMMER SCHOOL

The logo for PULSEES is rendered in a bold, blue, stylized font. The letters are thick and rounded, with a modern, geometric feel. The 'P' is particularly large and has a unique shape. The 'U' is also large and has a distinctive curve. The 'I' is a simple vertical bar. The 'S' is a thick, rounded shape. The 'E' is a thick, rounded shape with a horizontal bar. The 'S' is a thick, rounded shape. The 'E' is a thick, rounded shape with a horizontal bar.

Prague University of Light & Sound Experimental Engineering

July 8–28, 2013

The Institute of Intermedia offers a high-level education in the fields of art, new technologies and multimedia making studies at PULSEE Summer School a unique learning experience!

The courses will be led by world renowned artists and inspirational university lecturers.

For more information, visit: pulsee.iim.cz

SUBMISSION DEADLINE: MAY 31, 2013

Should you have any questions, please do not hesitate to contact me at hana.chmelenska@fel.cvut.cz

Looking forward to hearing from you,

Hana Chmelenská, (M.A.)
Communication officer | FEE CTU Prague/ Institute of Intermedia
Technická 2, Praha 6-Dejvice, 166 27 | Telephone: +420 602 692 931

The Prague Multimedia Summer School provides students and practitioners with modern approaches to the design and presentation of interactive artistic projects. The participants will learn how to work with a performance space, how to use light design systems and project technologies. They will gain basic knowledge of sound design, and will learn how to build a simple sound synthesizer and be able to implement their own multimedia or scenography project. The lecturers will introduce some of the successful collaborative projects that they have participated in, and the participants will learn about state-of-the art approaches used in setting up interactive art projects and performances.

This year's summer school features an intensive three-week course. Students will also participate in a weekend field trip in order to work on the site-specific projects, and also to experience the cultural and historical sites of the Czech Republic.
